GovernmentForms.software®

PROFESSIONAL SF 254/255/330'S

"The GFS program has proven itself to be by far, the most organized and efficient method of producing professional representation of our firm."

Suzanne Decker
Marketing Coordinator

"It makes what used to be the dreaded task of filling out the 254/255 a real pleasure and less than a third of the time it used to take us. I am no longer intimidated by these forms. You gave me the confidence to take control of them and really use them to our full advantage. It is so logical and will save us so much time. Thanks again..."

Mariellen Fisher
Marketing Director

"I highly recommend Government Forms Software for use with the SF 254 & 255. When we first installed it in our office we gave it to a temporary with limited computer skills to use... and without any help from us had learned the software and was using it efficiently within thirty minutes. It was that easy!"

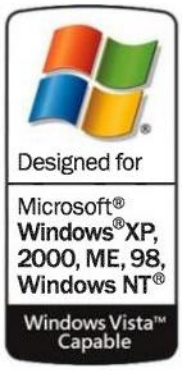
Ritchey Marbury III
National Chairman – ACEC

"I use to cringe at the thought of proposing on a government project, but with this software, I don't even give it a second thought. Thanks for the wonderful program and making my life easier at work!"

Tina Williamson
Administrative Assitant

THE A/E/C INDUSTRY'S LEADING SOFTWARE FOR PRODUCING STANDARD FORMS (SF)

- Create customized forms over 200 pages in length *on-the-fly*.
- Add, remove, drag and drop pages with a single click of the mouse.
- Enhanced Word Processing (RTF) with sizable graphic/image insertion.
- Auto-fill forms with **database lookup capabilities** (projects, resumes, consultants).
- 50,000 word spell checker (with suggestions).
- Easily exchange forms and data (electronically) with other offices, firms or consultants.
- Online training, an extensive help system, and Tips of the Day.
- Dozens of pre-built custom pages (single/multi-page resumes, projects and company information for both the SF254/255 and the SF330).
- Enhanced lookup lists & unlimited user-defined fields.
- Perform queries (SQL) & filters on the databases as well as summations and calculations.
- Built-in interface to other software packages.



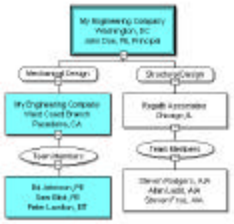
ADDITIONAL PRODUCTS

MS WORD/ADOBE INDESIGN INTERFACE

- Create MS Word documents from forms already created with GFS.
- Uses advanced state-of-the-art OLE technology.
- Text and graphics in converted forms are completely modifiable providing unlimited flexibility.
- Import spreadsheets, charts or other MS Office objects directly onto the forms.
- Export project and resume information directly from the databases onto custom templates that YOU design in Word.
- Perfect for cut-sheets, brochures and other private sector proposal requirements.
- **Now works with Adobe's InDesign!**

ORGANIZATIONAL CHART GENERATOR

- A key component in a successful bid is the capability to graphically represent your firm's organizational structure or project's hierarchy.
- Fast, intuitive, and simple to use.
- Easy export to BMP, JPG or MS Word.
- Quickly copy and paste sections from one chart to another.
- Integrates directly into Government Forms Software.
- Organizational charts are REQUIRED on the new SF 330!



CLIENT/SERVER, WEB-BASED AND ENTERPRISE EDITIONS

- Uses ANY ODBC Compliant Database:
  SQL Server, MySQL, Access, Oracle, Lotus Notes, etc.
- Eliminates data redundancy by accessing all information from one source.
- Record *tagging* allows for real-time multi-user collaboration on proposals.
- Database security controlled by firm's system/database administrator.
